A detailed view of the Biogripp Robotic Hand, showing its mechanical structure and five fingers with white, human-like skin. The hand is mounted on a base.

## Biogripp Robotic

Цена: 1800.00

Описание

Характеристики

Отзывы

Аксессуары

Mechanical system allows imitating the human movement Each finger stays independent Thumb can change is position to adapt to several grip strategies Hand uses 5 Actuonix PQ12 miniature linear actuators Allows to simplify the montage and to reduce the maintenance The Biogripp Robotic Hand (Metal Finish). Mechanical system which allows imitating the human movement with only one actuator per finger is patent pending. Each finger stays independent.

Аксессуары

Well-proportioned 1m tall humanoid shaped robot Fall detection algorithm utilizing a 9-axis IMU sensor 300FPS vision processing at 320x240 pixels Fully supports soccer mode for Robocup competition Walking algorithm for biped humanoid robot with balancing control The Robobuilder UXA-90 Humanoid Robot is a well-proportioned 1m tall humanoid shaped robot. It has been designed with a structure similar to the ratio of the ideal human body. Since the skeletal structure of the robot imitates the one from a human, it is possible to produce humanlike movement patterns. Because it uses various programming sources, it can be controlled in a lot of different ways. The robot also has pre-programmed emotional gestures and mouth expressions with synchronized sounds.

# Logging in admin panel Django

A screenshot of a web browser displaying the Django administration login page. The browser's address bar shows the URL `127.0.0.1:8000/admin/login/?next=/admin/`. The page features a central login form with a dark blue header labeled "Django administration". Below the header, the form contains two input fields: "Username:" with the value "admin" and "Password:" with masked characters ".....". A blue "Log in" button is positioned at the bottom of the form.

It is light on weight, low on power consumption and compact on size. It has 3 DOF + 1 DOF gripper, with maximum reach of over 710mm (28 in), max payload capacity of 4Kg at max reach, while weights under 10Kg. Wrist mounted color video camera provides high resolution (640x480) close-up view. Jaguar Arm is ideal for object inspection and handling.	✓
